ACKNOWLEDGMENTS

I acknowledge the Almighty God for his guidance and blessings which enabled me to successfully complete my studies. To God be glory and honour! I would also like to acknowledge the following persons as well as organizations, whose support throughout my academic journey helped to make the completion of this thesis a success: Dr. Micheal Kihara, my first supervisor, for his efficient supervision, constructive criticism as well as valuable contribution which enabled the successful and timely completion of this study; and Professor Levi Obonyo, my second supervisor, who helped shape my formative thoughts on this thesis and ensured that I stayed on course.

My profound gratitude also goes to the following: the management of Congo Initiative-Christian Bilingual University of Congo (CI-UCBC) for allowing me to undertake my masters' studies at Daystar University; Christian Presbyterian Church (CPC) for the financial support that enabled me to focus and successfully complete my studies; CECA 20 Beni for its collaboration during the data collection of this research; and all Daystar University community members who were really friendly to me during my integration in Kenya, may God reward each and each one of them. To all friends who God brought into my life when I needed help, I remain grateful.

DEDICATION

To my virtuous wife, Light Bendela Masika, and sons: Promesse, Prodige, Réussite, and Eben Ezer Bendela.

ABSTRACT

Communication Audit (CA) provides organizations with advanced information that may prevent major breakdowns. This study audited not only the communication channels and networks that CECA 20 uses to communicate with its internal publics, but also focused on whether the internal communication of CECA 20 Beni addresses the needs, concerns, and interests of the internal publics. Data was collected and analyzed quantitatively using descriptive statistics and presented in tables, pie charts, and figures, as well as in form of narratives derived from qualitative data. The data collection instruments were questionnaire and in-depth interview. Walk around observation was also used to determine some aspects of internal communication culture of CECA 20 Beni. The collected data was analyzed by use of Statistical package for Social Sciences (SPSS). The study found out that various channels are used for internal communication, amongst them: face to face, meetings, and telephones. Existing communication gaps such as non-existence of church website, lack of communication plans, unclear communication on responsibility, and lack of written down communication policy were noted. In order to improve internal communication at CECA 20, the study recommended that CECA 20 puts in place an organization's communication strategy along with other measures.
